PROFESSIONAL BIO

I am a motivated developer, who is goal-oriented with an astute awareness to technological and design trends.

While on a team I enjoy collaborating with others to create production ready services. I see myself as a hard worker with the drive and energy to influence real difference on any project

Currently I am seeking a role as front-end engineer with a result oriented company seeking to attract ambitious people.

EMPLOYMENT HISTORY

FRONT END ENGINEER & UI/UX DESIGNER

CUTSTRUCT TECHNOLOGIES |

September 2019 to March 2020

- Designed interfaces for the web and mobile application
- Converted the UI design to code with React
- Collaborated with other teammates on company projects via GitHub
- Maintained the code base of the company's web application and made performance optimizations to components

FRONT END ENGINEER

PRIMECLICK DIGITAL MARKETING AGENCY |

Nov 2019 till Date

- Developed several static pages and web applications for clients using either WordPress or Custom code, which was based on the client's choice
- On-boarded new clients with actionable phases in achieving their business needs with the agency
- Worked with the UI designer to implement an exact replica of his designs as code on web applications or static page
- Assisted my colleagues with issues related to code as a lot of our tools revolve around the coding ecosystem
- Managed developments of outsourced projects

FRONT END DEVELOPER

HNG Internship | July 2019 to Nov. 2019

- Concluded the internship as a Finalist
- I lead 3 teams to deliver a total of 8 projects across 3 stages
- Worked closely with teammates to ensure delivery on tasks assigned
- Implemented various UI/UX trends across our final websites, which is still being implemented
- Inspired teammates to adapt to new UI/UX trends
- Wrote clean, well documented and reusable code
